

The Millennials and Holy Innocents

If you look at 2018 numerically you will notice it equals = 11 year. It was an amazing year of challenges, but in a positive way. It also represents changes within the physical, mental and emotional bodies, towards a more spiritual understanding. This is a shift in energy consciousness within all of humanity asking us to find our inner truth. Our I Am Presence was aware of this moment of change and had been preparing all of humanity to recognise, that it is fine to start making the changes we have all felt so strongly about over the past few months and years.

It is a recognition of the changes we 'feel' and have been gathering momentum of late and now it 'feels right' to implement them at this Divine Time. The I Am Presence of every human is aware, and the Higher Beings of Light and Love will be guiding each one of us to recognise the changes required within the hearts and minds of every individual, raising their vibration from the old ways of thinking and being of the 4th dimension to the new understanding and what is required to bring forward the vibrations of the 5th dimension. If we want to help this planet go through her challenges then we have to be prepared to make changes within our own 3 minds and 4 bodies. Releasing the darker energies and fears, transmuting them into Light, helping to save this planet for future generations.

With the help of the Violet Flame of Saint Germain and the loving heart vibration of Mother Mary and the Company of Heaven, this will and can happen. Help is needed from our own I Am Presence. First, we must recognise our I Am Presence, then ask to be guided in the right direction to help create the new vibrations as we move forward towards the 5th dimensional energies for this planet. We must teach by example by showing others how to reach out, touching the hearts and minds offering food for thought.

Those of us that are over 30 years of age, knew from a higher perspective the reason we came to Earth at this momentous time in its history. We are here with our spiritual knowledge and wisdom to offer and guide the new enlightened souls who chose this journey at this particular time to help save this planet. These are known as The Millennials and the Holy Innocents; the 18 -30year olds and their children. They

may not be aware of their mission yet, but their individual I Am Presence is aware. All information will be filtered down into the conscious mind at the appropriate time for each person.

This is all about Earth's Ascension process. All those born from 1987 onwards are Karma free, they have no karma from past lives, in fact many are having their first incarnation here on Earth and it has been quite challenging for them as they adjust their vibration. The shift that took place in 2012 was of course the end of the 3rd dimensional vibrations on this planet, and because the 3rd dimension no longer exists, we could begin to integrate with the 4th dimensional energies. This was necessary for us all, to absorb all the new energies being offered at that time, helping with our rapid spiritual development. It was a time of offering people their wake-up call, they either resonated and were happy to accept the challenges of a new dimension or they stayed in the old ways of being, where they continue to live their life in the old ways of thinking and being, at a slower and lower pace of life.

Those that accepted the 4th Dimensional energies began to question their life here on Earth and how they just 'knew' changes needed to be made in all areas of life to progress and move forward. It was a feeling so deep inside and within our own heart that we realized we had to find a way of helping others to the recognition of the higher truths. Hence an influx of spiritual development that has taken place and of course Rahanni is but one therapy working with higher vibrations to help implement the changes on a more conscious level of understanding. Those that may have been left behind in their understanding, you possibly think nothing has changed about a specific person, don't be fooled, changes are happening albeit at a slower pace, but it will happen.

2018 was such an important year because of the Millennials and Holy Innocents having been encoded with unique consciousness codes from their I Am Presence, and will be brought into awareness gently at the appropriate time. These Sacred Consciousness Codes relate to a 'knowing' so deep within our hearts that we can say 'we are one and there is no separation; all that exists is LOVE.' Every time you work from your heart you shine your Light out into the universe helping to add to the Ascension Flame for this planet and beyond. Never underestimate the ability you have; you are able to touch the Christ Consciousness of all living things on this planet.

I cannot begin to tell you that when you offer your Rahanni healing, either hands-on, or through Distant healing you immediately connect to the Christ Consciousness of not only yourself, but your client – you become ‘one’ for there is no separation. That Love you hold within your heart gives a warm glow and a joy you cannot explain, it needs to be felt deep within your own heart.

Well, 2018 expanded that feeling for you, because the Ascended Masters and Higher Beings of Light have offered you that feeling a 1000-fold. As they embrace you, you begin to ‘feel’ that Light glowing within every aspect of your being. This cannot be taught; it is a state of mind and a ‘feeling’ in your body that has been offered from God/Source to us all.

It is up to each one of us to recognise this Divine Light and embrace it daily. For your soul, it is a magical experience, it has never felt the God essence quite so close whilst being in human form. There is no illusion with this, it is the truth of your uniqueness and recognition of a child of God/Source. When you accept this wholeheartedly, all imbalances within your mind and body can be healed; for the Love of the Christ Consciousness cannot ever be lost. So, to absorb the higher frequencies of Light, we have to release and transcend lower vibrations from our dense carbon-based energies of the 3rd/4th Dimension that no longer serve our higher purpose, and integrate our new 5th dimensional Crystalline Solar Light frequencies.

These higher vibrations will allow our own I Am Presence and the Company of Heaven to awaken and activate the Consciousness Codes of Light that are available for those of us wishing to progress and move forward with 5th Dimensional energies, but everything must come from your heart centre. There is no point in saying, ‘Oh yes, I want to move forward and work with 5th D vibrations’, when you still have to release and let go of a few lower vibrations, such as judgement, intolerance, lack of integrity. If you are not willing to change, then you will be held back, for no dark energies can be a part of the 5th Dimension, this is universal law.

Never under-estimate how much Light from just one person can make a difference within the 5th dimensional vibrations and how you add to the Ascension Flame for the planet and beyond. All of the Activations I offer can help with every aspect of

your spiritual journey, for all Higher Beings of Light know each one of you and what is required, just trust and enjoy the special moments offered through my CDs.
