

Holy Innocents – Additional information.

I have offered you earlier information of the Millennials and Holy Innocents but I feel we have to keep updated on what to look out for with these amazing children. I am sure many of you will understand from the information I am about to give, that you know these children are different in some way and maybe they are a part of your Family, so let me offer a glimpse into these amazing higher vibrational children, so you may understand them and the differences they are showing to the majority of children on this Earth plane.

First these children seem to have rather large eyes, they are very quiet as they watch and learn about life here. They are able to understand many things at a very young age, they tend to speak earlier than other children. They are forward in many things and their speech at times can knock you sideways, especially the way they explain situations to you. They are direct and speak their truth, but in a loving way. They do not tolerate injustice on any level. They can blow you away with their knowledge and will mention things that you have never taught them and you wonder, how did they know that? They can also be intolerant to certain foods, especially those that have lots of chemicals within the cooking process and could possibly have upset tummies until they are able to speak and tell you of the foods they prefer to eat for they know what is right for their little bodies. They are very loving and enjoy hugs and can be very touchy-feely children.

Many of these children have never had a life on Earth before, this is their first incarnation plus their DNA is of a higher vibration. They are here to learn but to teach so much, for they are special in many ways. All children are special, we know that within our heart, but the Holy Innocents being born since 2012 onward are of a higher spiritual vibration and they will blow you away with their questions and the knowledge they already have.

I can see first-hand how these amazing children are going to make a difference to our world as I have many of them in my family. The 22 Grand and Great Grandchildren I have been so blessed with, allows me to notice many differences and I am taking notes, for it is amazing for me to see and hear this, then I can share the experiences with you all, and I am sure you will agree, for you will see this in your own families. Enjoy these beautiful souls for they are our future.

Many Blessings

Carol x
